aymenbox.github.io 

Full stack web developer, with more than 2 years of experience. I learned to code from an early age in various computer languages (JavaScript, PHP, Python...) and created personal projects to present on my GitHub profile. I master the different technical stages of creating a website or mobile application; from understanding user needs, to frontend and backend development and maintenance.

EXPERIENCE

FEBRUARY 2022 – JUNE 2022

Web Application Developer /Centre National de l'informatique pour Enfant, Tunis, Cité Khadra

I created a management system for the CNIPE which allows the management of Trainers, Children, Center Materials, Training Sessions, ...

- Creating API backend with Spring Boot
- Developing the front-end part with quasar and Vue JS for multi-platform support

2021 – THE PRESENT

Freelancer

I participated in many Freelance projects over the past year, which helped me learn new technologies and improve my skills.

JUNE 2021

Full-stack web developer / Silver Digitale Tunis Lac 2

During my internship in Silver Digital I created an HR management system

- Creating an application that manage company employees
- Maintaining a backend Linux Ubuntu server

2019 – THE PRESENT

Python trainer / ASTBA (Association de Science et de Technologie Ben Arous

I have worked with ASTBA association in many projects, most of my work was teaching web development and game development to children and organizing programming events and competitions.

- Python trainer for kids age (12--17)
- Creating educational videos
- Web development trainer
